

## NATIONAL MONUMENTS SERVICE

## **Monument Report Form**

The following report form has been designed to assist persons who may wish to supply information on newly discovered monuments. The current operational policy of the National Monuments Service is primarily to record monuments dating from the pre-AD 1700 period. Please check the records of the Archaeological Survey of Ireland on the National Monuments Service website <u>www.archaeology.ie</u> before sending in a report to ensure that the monument has not already been recorded. This Monument Report Form will form part of the Sites and Monuments Record.

Irish Transverse Mercator co-ordinates:	E: N:		
Irish Grid co-ordinates:	E: N:		
The Archaeological Survey of Ireland uses mapping provided by OSI: this utilises the Irish Transverse Mercator (ITM) co-ordinate system. This replaces the former Irish Grid referenced mapping. If possible, please supply ITM co-ordinates. These should be determined using a Global Positioning System (GPS) unit that is enabled for the ITM co-ordinate system. A twelve-figure reference should be determined at the centre of the monument (six for easting and six for northing). Alternatively, users may derive the ITM co-ordinates from the mapping component of the National Monuments Service website (www.archaeology.ie).

References (where relevant): (i.e. publications, web address, etc.)

**Other notes:** For example, if the monument has been found as the result of a licensed archaeological investigation then the **licence number** should be given and if the monument has been completely excavated (i.e. there is **NO** surviving archaeology above or below ground surface) this should be noted here. If the monument has been discovered as the result of geophysical investigations then this should be stated. If there is a planning application associated with it, the planning reference number should be given.
